PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in full-stack development, AI/ML integration, and backend systems. Built REST APIs and AI-powered applications. Strong foundation in **Data Structures & Algorithms** (350+ LeetCode, Rating 1650), **System Design**, and **AI/ML development**. Passionate about building intelligent, user-centric fitness and wellness technology platforms.

EDUCATION

Keshav Memorial Institute of Technology

Bachelor of Technology in Data Science

CGPA: 8.54/10

Hyderabad, India

Aug 2023 – Jul 2027

Intermediate (12th): 94.3%

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Backend & APIs: Flask, Node.js, Express.js, RESTful APIs, Asynchronous Processing (Celery), Redis

Frontend: React.js, HTML5, CSS3, Bootstrap, EJS, Responsive Design

Databases: MongoDB, MySQL, Redis

AI/ML & LLMs: Machine Learning, Deep Learning, NLP, Reinforcement Learning, Generative AI, LLMs, RAG, Transformers,

Cloud & DevOps: AWS (EC2, Lambda, S3, SNS), Docker, Kubernetes, Terraform, GitHub Actions, CI/CD

Security & Architecture: JWT, OAuth 2.0, CSRF Protection, Rate Limiting, Circuit Breaker, Idempotency, System Design Patterns

AI-Augmented Development Tools: VS Code, Google Antigravity (with Skills.md), Cursor, Copilot

FOUNDATIONAL STRENGTHS

- **Data Structures & Algorithms:** 350+ problems solved on LeetCode.
- **System Design:** API gateway patterns, load balancing, caching strategies (ETag, Redis), rate limiting, circuit breaker.

EXPERIENCE

DrugParadigm

AI / Software Development Intern

Hyderabad, India

Feb 2025 – Nov 2025

- Built **Flask REST APIs** for data analysis pipelines with error handling, logging, and comprehensive documentation.
- Implemented GPU-accelerated workflows using **Roshambo** for conformer generation, delivering significant performance improvements through parallel multi-GPU processing.
- Extended open-source Python packages with new components following **SOLID principles** and PEP 8 standards.
- Delivered iterative improvements on a weekly basis, consistently adding features to enhance model capabilities.
- Implemented testing and maintained clean code architecture for maintainability.

PROJECTS

EmotiLearn: AI-Powered Adaptive Learning Platform

[GitHub](#)

Tech: React.js, Node.js, Express, MongoDB, Custom Transformer, MediaPipe, AWS

- Built full-stack MERN application with custom-trained transformer model for real-time facial emotion recognition using insights from DeepFace, CLIP, and Vision Transformer architectures.
- Designed RESTful APIs with **JWT + CSRF authentication**, ETag caching, and validation middleware.
- Implemented rate limiting, idempotency patterns, and input validation for API reliability.
- Deployed on AWS with Terraform for infrastructure automation.

FixMyHyd: AI-Powered Civic Issue Reporting Platform

[GitHub](#)

Tech: Flask, SQLite, LangChain, Google Gemini API, Celery, Redis

- Built LangChain framework for intelligent issue categorization, conversation management, and report generation.

- Integrated Google Gemini API for image analysis and voice transcription with multi-language support (Telugu, Hindi, English).
- Implemented asynchronous task processing with Celery + Redis for fault tolerance and reliability.
- Designed secure APIs with JWT authentication, input validation, and CSRF protection.

Reinvent-Scoring: GPU-Accelerated Scoring Engine

[GitHub](#)

Tech: Python, RDKit, Roshambo (GPU-Accelerated), Flask

- Enhanced open-source Python package with GPU-accelerated Roshambo for conformer generation and high-throughput scoring.
- Implemented parallel multi-GPU processing for improved performance through efficient resource utilization.
- Designed clean APIs following PEP 8 standards with testing, documentation, and error handling.

Nivasa: Full-Stack Hotel Booking Platform

[GitHub](#)

Tech: Node.js, Express, MongoDB, Bootstrap, Mapbox

- Built MERN booking platform with transactional operations, geocoding search, and responsive UI.
- Implemented idempotent RESTful APIs with ETag-based concurrency control and transaction safety.
- Integrated JWT + Google OAuth authentication with secure session management and CSRF protection.

HACKATHON PARTICIPATION

- **FixMyHyd – Buildathon Hackathon:** Developed an AI-powered civic issue reporting platform in a competitive hackathon; implemented end-to-end from ideation to working prototype with LangChain, Gemini API, and multi-language voice support within the hackathon timeline.

CERTIFICATIONS & ACHIEVEMENTS

- **Web Development (Delta)** – Apna College (Full-Stack MERN Certification) 2024
- Active open-source contributor (reinvent-scoring package enhancements adopted by research community)
